PROFESSIONAL EXPERIENCE

MEDICAL COLLEGES OF NORTHERN PHILIPPINES/ INTERNATIONAL SCHOOL OF ASIA AND THE PACIFIC. - WEB DEVELOPER | Link   Laravel , Javascript , HTML , CSS , Bootstrap

- As part of the ICT TEAM, I developed a good grasp of how to make a Student Information system with Registrar/Finance and Enrollment, deployed to MCNP-ISAP, I was able to see problems in a very diverse perspective. I am able to switch between different perspectives, a developer, a teacher, students and parents, this allows me to communicate with the team properly and is able to explain problems in a non-technical manner wherein any of the 3 perspective can understand."I am also involved in backend activities to implement logic and ensure cleaner code. Being in a team as a Web Developer requires a good understading of how to work and understand what the ideas of the team are trying to achieve, and should be able to practice good communication and share the ideas of mine from others.
- Duration: September 2022 - Present

FREELANCE FULL-STACK DEVELOPER | Link   PHP, Laravel, HTML, CSS , Javascript , JQuery

- As a freelancer, I was able to develop good technical and non-technical skills to transform customer ideas to web applications, you should have a very good understading of ins and outs of software development from requirement analysis to product deployment. I was able to practice Agile Development, because of constant development-feedback cycle with the customers. Being a good communicator and reliable is must while doing freelance work because you are working directly with non-technical customers. I also developed some negotiating and marketing skills that is very important for a freelancer.
- Duration: January 2021 - August 2022

PERSONAL PROJECTS

BARANGAY PROFILING SYSTEM WITH SHORT MESSAGE AND DATA ANALYTICS,IN BARANGAY SAN ROQUE AND QUIBAL PEÑABLANCA, CAGAYAN VALLEY, PHILIPPINES | Php , Javascript , JQuery , MySQL, HTML, CSS

- This is an Barangay Information It aimed to provide systematic profiling system which can the authorized users easily manage residents' profile, generate statistical reports, and the provision of updating the records. It also generates barangay clearance of residents whenever they apply for it. On Analytics it will be able to see the number of residents, the number of houses and the number of households in the Barangay and more like the number of residents who have been vaccinated and how many have a

PhilHealth and Pag-Ibig account. In Short Message Service it will message all residents of Barangay if there is a relif goods and other announcement that announce by the Barangay captain.

SCHOOL MANAGEMENT SYSTEM WITH FINANCE AND ACCOUNTING | Link   Php , Laravel, Html, Css, Javascript, JQuery

- This professional project, solely developed by me at mcnpisap, delivers a comprehensive school management platform with integrated finance and accounting features. It allows educational institutions to efficiently manage students, staff, classes, and financial transactions in one unified system while providing insightful reporting and analytics for administrative decision-making.
